RE: Curbside Recycling Cost Savings

Thank you for your query regarding the cost of the residential curb side recycle service. The solid waste fee on a resident's utility bill in 2019 includes \$4.50 per month to cover the budgeted cost for the curb side recycling collections service. As you are aware the discontinuation of the curbside collection service means a surplus in the Solid Waste Utility is projected at year-end. The "savings" on utility bills in 2020 onward depends on Council's direction to enhance service at the Wolf Creek Recycle Depot, pursue other sustainability initiatives, or adjust utility rates moving forward. Additional information will be brought forward to Council during the 2020 budget deliberations.

Please let me know if you have any further questions about this item.

Sincerely,

Jordan Thompson, CET, PMP
Director of Operations and Planning
