## OPEN DURING CONSTRUCTION

The Main Street project has advanced into Stage 2, with workers expanding the construction zone west to 51 Street and south on 49C Avenue. Crews will replace the Stage 2 sanitary main in 50 Avenue and the water and sanitary main in 49C Avenue over the next two weeks. The watermain down 49C Avenue will also be replaced to improve water flow in the area.

Concrete crews are currently onsite in the Stage 1 area, extruding new curb and gutter on both sides of 50 Avenue. Workers will continue preparing the sidewalk base and pouring new sidewalk in sections over the next couple of weeks. Light compaction equipment will be used to pack the sidewalk base, which significantly reduces the likelihood of cracks forming in the new sidewalk. Gravel ramps and temporary wood bridges have been constructed to maintain business access until the sidewalk is ready for pedestrians.

We understand frontal access is critical to ensure you reach your favourite business, so if you have any questions or

concerns with the ramp or temporary bridges, please let us know. We want the opportunity to address any issues immediately. **Businesses are open and accessible!**

The recent rainy weather has delayed completion of the Stage 1 area by a couple days. Our current projections indicate that Stage 1 will be re-opened to vehicle traffic around the second week of July, when concrete work is complete. Stage 2 is scheduled to be open to vehicle traffic toward the end of July.

Overall, the project is still scheduled for completion by the end of October; however, please note that construction schedules can change based on a number of variables. Reading this newsletter is the best way to stay up to date.

Please go to [Lacombe.ca/mainstreet](http://Lacombe.ca/mainstreet) for pedestrian access maps, parking location maps, detour maps and other project information.
